

**Pressure-Pro Proudly
Introduces the All-New
Eagle Series Electric V-belt Drive Pressure Washers!**

This Series offers flow rates from 3.5 to 4.0 gpm and pressure ranges of 2000 psi to 4000 psi. All models are powered by Baldor commercial industrial-grade electric motors, and feature AR, Cat, and GP V-belt drive pumps. The units feature our signature aircraft-grade aluminum frame with lifetime warranty, adjustable pressure unloader valve, bypass plumbing, and thermal relief valve. Standard accessories include trigger gun and insulated-grip wand assembly with quick connects, 50 ft high pressure hose assembly with quick connects, chemical injector assembly with quick connects, and 0-, 15-, 25-, 40-, and 65-degree quick connect nozzles.

**Lechler Announces Flat Fan
Spray Nozzles**

Lechler, Inc. has a complete line of flat fan spray nozzles for use in a wide range of spray applications. Flat fan nozzles cover a fan-shaped area on a single plane and are most appropriately used in a stationary position on a conveyor when the target moves through the spray or when the spray itself is independently moved over the target, such as on a wand. Most flat fans have a parabolic distribution, meaning the flow is heavier toward the center of the spray than the edges. This means the nozzles should overlap their coverage on a spray header to provide an even distribution of fluid over the entire spray target. Typical applications for flat fans include cleaning, coating, cooling, lubricating, rinsing, parts washing, high pressure cleaning, surface treatment, printed circuit board etching, degreasing, phosphating, and foam control. Lechler's flat fan line includes threaded nozzles, tip nozzles, deflector nozzles, ball-type nozzles for easier directional spraying, clip-on nozzles, which clamp directly to a header pipe, high impact nozzles, and high pressure nozzles.

**EnviroSpec Unveils New Super Concentrate
Aimed at Mold and Mildew Remediation**

EnviroSpec expands its SuperFlo Polymer line to include its newest product EnviroMINT. EnviroMINT is a super concentrated house and roof wash with a fresh mint fragrance that was developed for the contract cleaner that specializes in mold and mildew remediation typically found in the house washing and roof cleaning industry.

EnviroMINT contains a variety of 'builders' and 'specialty surfactants' specifically designed to attack and kill mold and mildew while leaving a microscopic barrier that helps to retard future build-ups. It also contains our exclusive SuperFlo Polymer complex, which is the life blood of EnviroSpec's performance mobile wash chemicals. In addition to its incredible coupling capabilities, this SuperFlo Polymer complex also contains high concentrations of high-yield gloss enhancers that will help to revive surface luster. EnviroMINT is bleach friendly at concentrations of one part bleach to four parts detergent. EnviroMINT can be purchased in a 55-gal or 5-gal drum pak.
